

Scope/Statement of Work

Dr. C. Titus Brown, Dr. Tracy Teal and a graduate student RA will organize and teach one 2-3 day Software Carpentry workshop targeted for students in the National Science Foundation's Research Experience for Undergraduate program at the beginning of each summer of the project (2015-2019). This workshop will teach fundamental scientific computing skills to these students. Following the workshop the graduate student will meet regularly with the undergraduates to provide further training, technical support, and mentoring with respect to computational methods and approaches to science.
